Therefore, further action by the applicant is required to avoid abandonment of this application. A proper reply to a final rejection under 37 CFR 1.113 may only be either: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). 1. The proposed amendment(s) will not be entered because: (a) they raise new issues that would require further consideration and/or search (see NOTE below); (b) they raise the issue of new matter (see Note below); (c) they are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or (d) they present additional claims without canceling a corresponding number of finally rejected claims. NOTE: \_\_\_\_\_ 3. Applicant's reply has overcome the following rejection(s): \_\_\_\_\_. 4. U.S. Patent and Trademark Office
PTO-303 (Rev. 04-01)

Continuation of 5. does NOT place the application in condition for allowance because: The examiner interprets "the housing" to be the obturator housing not the cannula housing as interpreted by the Applicant; therefore the examiner still believes that the prior art reads on the claims. With regards to the orientation, this is interpreted as functional language and therefore the prior art is capable of performing this task. With regards to Schwemberger et al. the examiner interprets that this prior art would be capable of moving the guard to move relative to the penetrating tip upon a force, once the latch is released, especially since this claim is an apparatus claim and this language is function, the examiner interprets Schwemberger et al. to be capable of performing this function.
